Carol Ogilvie is a project management professional working in the IT industry for over 22 years, focusing on implementing transit systems for over 17 years. She is currently the Manager, Business Systems at Brampton Transit and throughout her career, she has had opportunities to lead and coordinate small to large projects/programs building strong partnerships and implementing projects which enhances and moves operations to the next level for efficiency and data gathering.

Before working at Brampton Transit with the implementation of Züm, Carol worked on projects for the Toronto Pearson International Airport implementing various Operational Management systems and infrastructure projects.

One of her passions is education and as a certified teacher, has coupled this in her volunteer work getting the next generation interested in transportation technologies. She is currently a member of both ITS Canada (Vice Chair of the DEI committee) and CUTA, is the President/Chair of the Learning Disabilities Association of Peel Region and is one of the advisors for DIGITP (Digital Impact Transformation Program) which supports youth to explore cybersecurity as a career option. In addition, she is implementing a program for high school and post secondary students to work with her current team through co-op or summer jobs. If that isn't enough, she also mentors young girls through the Power to Girls Foundation.
